Q2.

Problem statement: There are 2 organizations in a city named GEU & GEHU, design a network b/w the SOC department of GEU & GEHU. Also show the communication b/w user no. 1 of GEU & user no. 2 of GEHU.

Objective: create Peer to Peer Connections

Step 1 - Drag 2 pc to working area

Step 2 - Connect them with Copper Cross-over and then select fastethernet0 for both to establish connection.

Step 3 - give IP address & Subnet Mask by manually in both PC / user

Step 4 - Check Connection b/w them by ping command. Open command prompt by clicking on pc then go to desktop & enter ping command with IP address of 2nd pc.
