

Ans problem Statement: design a network b/w SOC department & Grehu.

Objective: To understand how the communication b/w user no 1 of Grehu to user no 2 Grehu.

Description: Steps of practical & paste. Snapshot of network design IP configuration & connectivity

Steps.

- Two switches & PCs and 1 Router, & copper straight through.

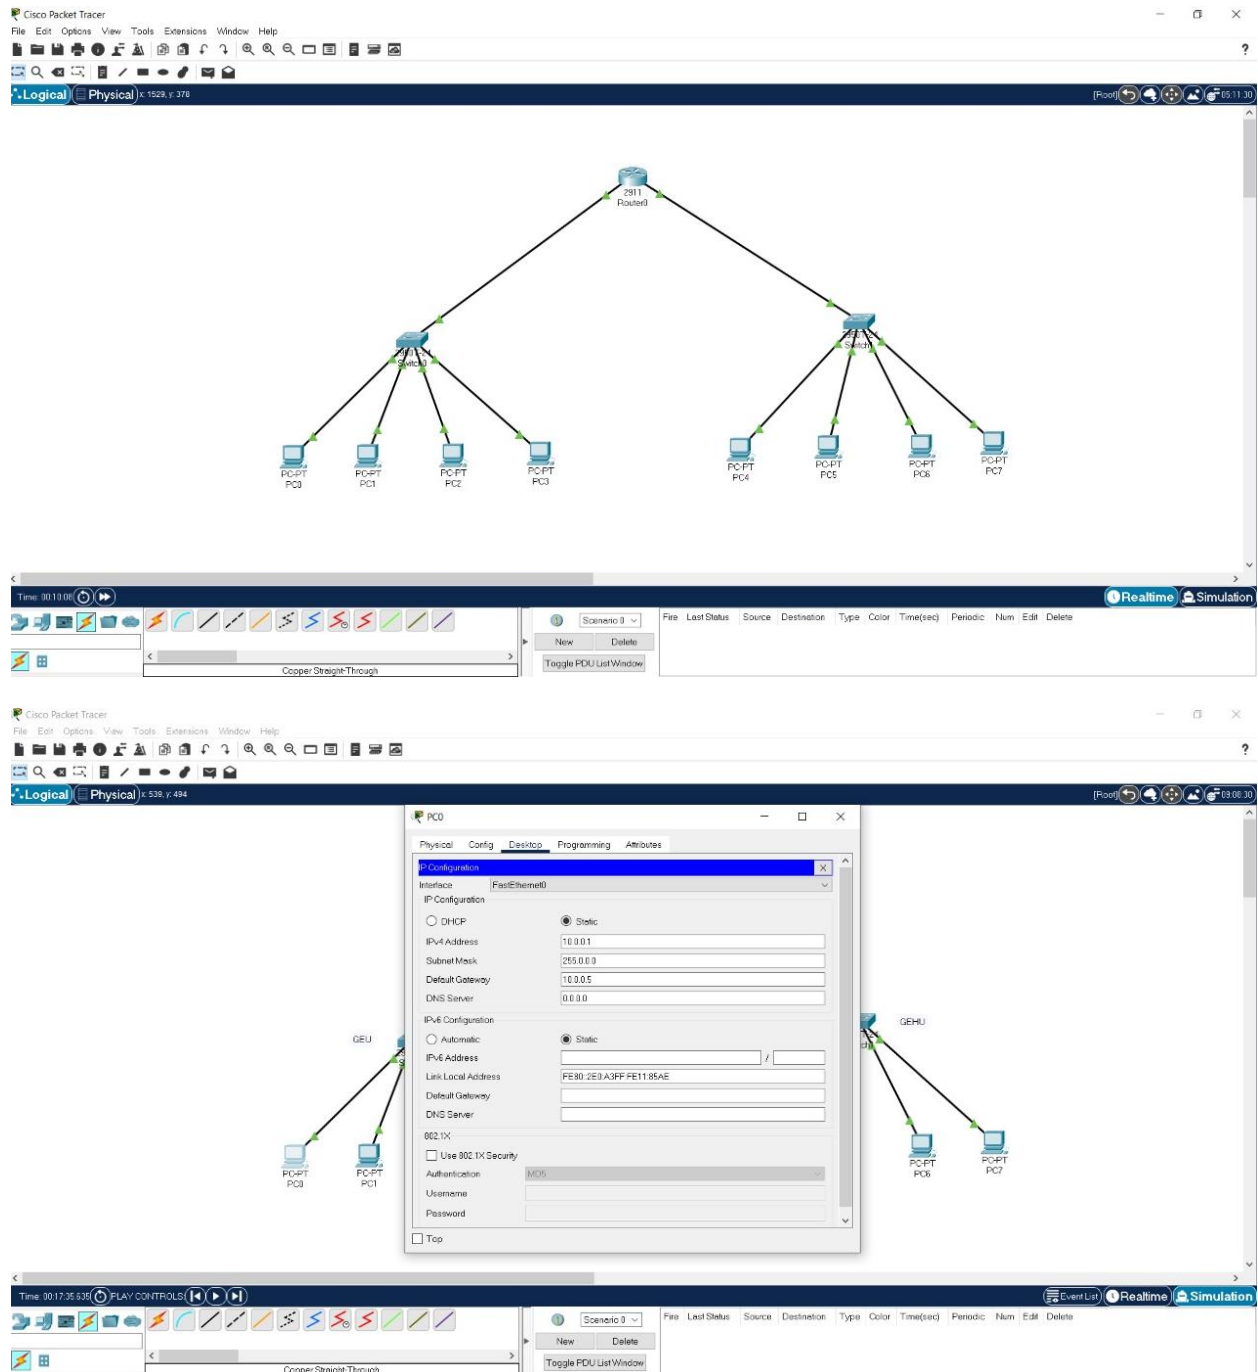

- Setting IP for PC 0 IPV4 Address 10.0.0.1 then exit.

- Same for all PCs just increment by 1.

→ checking connection.

- go to simulation panel, tap on. Add simple PDU for checking communication. i.e PC no 1 to PC no 2 in any.
