Q1)

Problem Statement: - There is an organization A with multiple department. Design a network for the HR department & the size of the department is 10 users. Also show the communication b/w user number 1 & user number 5 of the network.

Objective: - To understand how to configure the IP address dynamically & how two pc can communicate.

Description: DHCP: The Dynamic Host Configuration protocol is a network management protocol used on the Internet protocol network for automatically assigning IP address & other communication parameters to device connected to the network using a client-server architecture.

Server: - A Server is a computer or system that provides resources, data, services or program to other known as client, over a network.

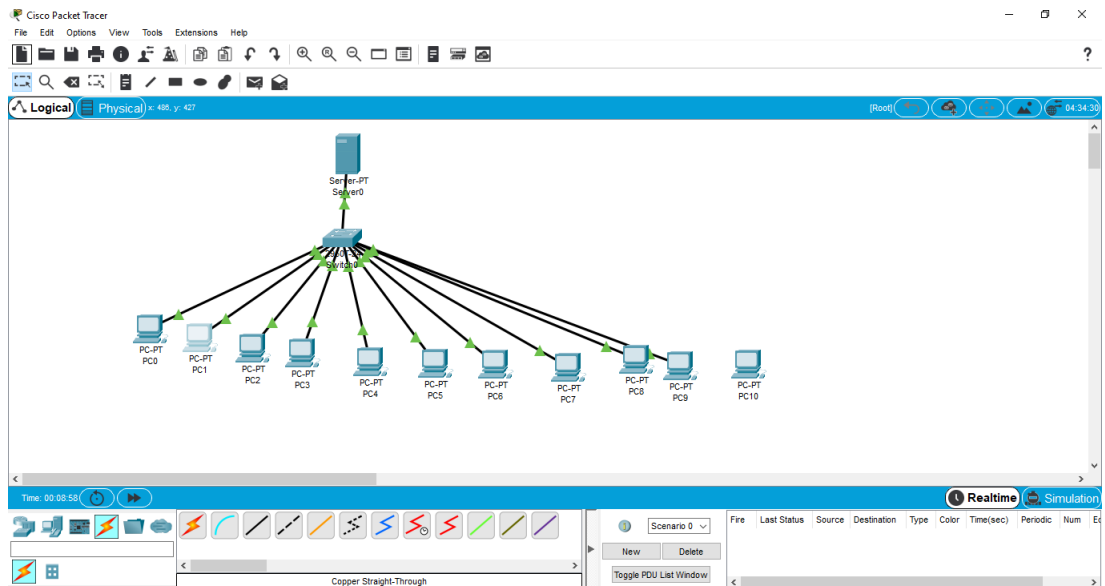

Shubham Balodi

Step 1:- Take the 10 pc, one switch & web server

Step 2:- Config the setting of Server

Step 3:- It's assign the IP dynamically to the nodes.

Step 4:- using command prompt use ping Command to Communicate the pc b/w 1 & 5.

PC1

Physical Config **Desktop** Programming Attributes

Command Prompt

```
Packet Tracer PC Command Line 1.0
C:\>ping 198.162.10.5

Pinging 198.162.10.5 with 32 bytes of data:

Reply from 198.162.10.5: bytes=32 time=1ms TTL=128
Reply from 198.162.10.5: bytes=32 time=3ms TTL=128
Reply from 198.162.10.5: bytes=32 time<1ms TTL=128
Reply from 198.162.10.5: bytes=32 time<1ms TTL=128

Ping statistics for 198.162.10.5:
    Packets: Sent = 4, Received = 4, Lost = 0 (0% loss),
    Approximate round trip times in milli-seconds:
        Minimum = 0ms, Maximum = 3ms, Average = 1ms
